

9 April 2020

To whom it may concern:

AgriCensus is a company that provides the global agriculture trade with market intelligence, news and pricing data. Founding in London in 2017, we decided to set up an office in Ukraine in 2019 owing to its importance as an industry hub.

To help follow local regulations we retained the services of Volodymyr Misyurak, who assisted us not only in day-to-day business registration matters as well as more complex issues including taxation, registration and employment of foreign staff, as well as helping to acquire and extend relevant residence permits for a long-term stay in Ukraine.

During the COVID-19 outbreak, when travel limitations were introduced in Ukraine, Volodymyr has kept us informed of relevant developments in a timely manner, offering valuable legal advice and acting on our behalf in different business-related matters.

Volodymyr's a helpful, attentive and professional lawyer and has been able to assist in every aspect of starting a business in Ukraine and taking care of daily tasks.

He comes highly recommended.
